### **Restriction/Election**

This application contains claims directed to the following patentably distinct species of the claimed invention:

- I. Claims 1-10, drawn to a connector including a front projection, a central projection and a rear projection (see figures 2C and 2D.)
- II. Claims 11-14, drawn to each sunlenses including a tab secured to the connector on each end of the bridge connector portion (see figure 13C.)
- III. Claims 15 and 16, drawn to sun screening assembly having a bridge portion including an elongated slot (see figures 14B and 14C.)
- IV. Claims 17-20, drawn to two connector projecting from the bridge portion for mounting the sunglasses on the pair of eyeglasses (see figures 9A - 9E.)

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
